
Symbol Library available somewhere ?

Posted by tomatoe - 2007/06/01 20:35

Is there a Symbol Library available somewhere for the oil / gas industry ?

I am using AutoCAD2007 and have come to a pipe segment show below:

http://www.datamd.net/CaHTS_proj_2007/images/cap178_2007-06-01.jpg

Having a resource to match objects would very helpful so that I could ask better questions, etc.

In case the image above did not show up very well, here it is again:

http://www.datamd.net/CaHTS_proj_2007/images/cap178.bmp

I'm not quite sure where my 1st post to this forum went, a simple: "Hello World" to the group, perhaps this is a closed area, in which case my apologies.

There are several software packages available for the Piping/Oil industry specically for AUTOCAD. A couple of them are CADTOOLSONLINE.COM or CADOPOLIS.COM. You can find more by doing a GOOGLE search for "autocad pping blocks". Some offer free downloads. Best of luck in your career!
